

Customised Project solutions 8 Way Chain Motor Controller

Standard Unit:

- 8 Way Three Phase 32 amp Motor Control including 8 way hand piece.
- Individual motor selection on controller.
- Up and down selection for each motor on hand piece.
- The chain motor controller is a 3U rack unit. It is design to fit either a 5U road case with a 2U draw to store hand piece for touring or permanent installation into rack unit.
- Standard unit comes with output on terminal blocks. Optional Back panels to fit either road case or permanent rack installation with either Wieland 6 Pole, Wieland 24 Pole, or Socapex 19 Pole can be supplied.
- High Speed RS-485 Communications Bus. With independent "GO" and "E-Stop" signals ensuring Safety and a highly responsive system.
- Phase Sensing and Reversal Indication and Changeover.
- Multiple hand pieces can be attached for Installations.
- Front Panel LED status mimics hand piece operations.
- Controller can control both 24v and 48v hoists.
- Multiple 8 Way Controllers can be linked up using common Go and E stop Buttons, or a larger hand piece.

Options:

Custom designed back panel.

Can be wired for Single Phase Motor Control.

External Module for 3phase Contactors to control "Direct Drive" Motors.
